

# Confined Space - Vessel Entry

## Incorporating Search & Rescue Procedures 2 Day Overview

### Overview

This course is designed to provide delegates with a thorough understanding of the dangers of confined spaces. They will also be shown how to enter, work and leave confined spaces including a vertical shaft, using escape sets and full working breathing apparatus. Delegates will be trained in search and rescue techniques using breathing apparatus.

This course is designed by managers, supervisors, engineers and operatives.

### DAY ONE
