

BIS Skills Centre

Working at Height Training 2011

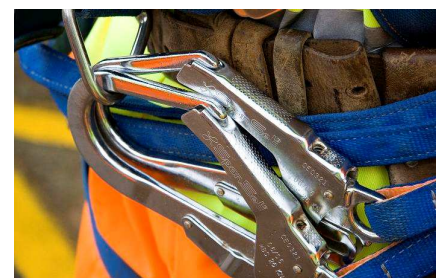

Calling All HSEQ Staff

The BIS Skills Centre would like to offer a complimentary place on our Working at Heights training courses to one of your HSEQ personnel.

We have noticed a vast increase in office based staff attending our courses, in particular HSEQ personnel, and our Instructors are now being asked for specific advise on Working at Heights procedures, rescue plans and methods of work restraint.

Our extensive Working at Heights courses are continuing to prove very popular and due to the fact we run these daily, we are now the number 1 training provider for Working at Heights in Aberdeen.

Working at Heights Unit 2 PPE User is our most popular course and runs daily. We can also supply Working at Height Rescue, Management and PPE Inspection courses every week.

To take advantage of this offer, please email training@salamis.com or call 01224 246499
