

# BIS Skills Centre

## Working at Height Training 2011

### Due To Popular Demand

The BIS Skills Centre is happy to announce that our very popular Working at Height Unit 2 is now available every day of the week, Monday through to Friday.

Working at Heights Unit 2 is designed for candidates who are actively involved in working at height. It provides an outline of the legislation, equipment standards, marking, inspection, record keeping and maintenance. Training is given in the correct practical use of PPE along with a theoretical knowledge, intended purpose and as close as possible to the candidates work situation. Practical inspection and defects identification is carried out using differentiated set of samples.

We also supply Working at Height - Rescue, Management and PPE inspection courses every week.

Last minute bookings are accepted subject to availability.  
For further information please contact the BIS Skills Centre.
